# REVIEWER INDEX

## to Volume 102, September–December, 1982

Below is a list of the people who reviewed manuscripts for GENETICS during the preparation of Volume 102.

The aim of GENETICS is to communicate significant research. To succeed, we must recognize what is significant; we must make sure the presentation is accurate, unambiguous and yet readable. For this, we depend heavily on our reviewers, who perform this indispensible service without reward. The quality of the journal can be no better than the quality of their efforts. We apologize to any reviewer whose name has been inadvertently omitted, and we are sincerely grateful to all.
